

PEOPLE ALCHEMY

Modernising training in the care sector

A digital eportfolio for the NHS and general health & social care.

The People Alchemy eportfolio is helping NHS Trusts move their training and certification programmes from paper and old systems onto a modern digital platform.

- Reduces admin overheads
- Improves compliance numbers
- Manages the observational assessment process
- Automates much of the ongoing administration
- Improves learner engagement and learning results
- Gives oversight and clear visibility of who needs help or 'encouragement'
- Full audit trail and reporting for management info and for investigations

Compliance and improved patient care

Our platform is designed to bridge the gap between knowledge and action, ensuring health and social care staff don't just absorb information but apply it to improve their performance and enhance patient outcomes.

Who it's for?

Individuals and teams within the NHS and care sector committed to excellence in patient care:

- Health & social care professionals
- Clinical staff
- Healthcare assistants
- Onboarding new staff

"The platform is easy to implement, and learners find it intuitive to use, so there is no need for training on how to use the system. I've already told colleagues that if they are looking for a technology solution for the Care Certificate then this is the perfect solution."

Lindsay Roodurmun,
NHS Trust L&D manager

About our digital eportfolio

People Alchemy's Learning Workflow Platform (LWP) is a transformative digital eportfolio for the NHS and care sector. Designed to support the development and assessment of clinical competencies and skills, our platform offers a range of benefits that set it apart in the healthcare industry. For example...

- **Customisable learning pathways:** Tailor learning experiences to meet specific organisational needs and standards, allowing for personalised learning journeys.
- **Real-time tracking:** Monitor progress and competencies with ease, ensuring that learning objectives are being met and that staff are up to date with their skills and CPD requirements.
- **Mobile accessibility:** Access learning materials and assessments on-the-go, providing flexibility and convenience for busy healthcare professionals.
- **Automated actions:** The system sends out automated reminders and alerts, and escalates any concerns to administrators for early action.
- **Evidence-based learning:** A focus on practical application and reflective learning ensures that training translates into real-world clinical skills and improved patient care.

Example platform applications:

Care Certificate

Streamline the delivery and oversight of the Care Certificate

Preceptorship programmes

Support newly qualified staff through a structured digital preceptorship

Clinical skills development

Facilitate the acquisition and assessment of clinical skills with an audit trail

Safeguarding

Improve both compliance and application in practice

Management development

Effective management is just as critical as care and clinical skills

Allied health professionals, CPD recording, and more...

Flexible and feature rich

Applications
